Major

This degree prepares you for teaching positions in Career and Technical Education (CTE) high school and college programs. Graduates with the CTE Composite Major are prepared to teach in trade, industry, technical fields including areas such as automotive technology, construction technology, electronics, health careers, and welding.

Non-teaching program graduates may also seek management or entrepreneurial careers in the private trade, industry, technical or health fields. To be eligible for the degree, students should have a documented technical specialty area.

“The CTE baccalaureate degree has helped our CTE faculty become well versed in the Career and Technical Education field. They were experts in their specific occupational fields, but, in most cases, had little background in Career and Technical Education and educational theory. We have seen great personal and professional growth in our CTE faculty who have completed their degrees from VCSU. As a whole they are more confident and skilled in their teaching, and we have seen several assume leadership roles on campus.” —Doug Darling, President, Lake Region State College

“Valley City State University rose to the occasion to assist the Department for Career and Technical Education in its efforts to create a degree program for Trade, Industry, Technical and Health Careers instructors. The content of the degree program is relevant to the needs of teachers with industry experience by adding instructional methodology to their experiences. This partnership has proven to be a very successful collaboration.” —Tony Scheerz, past supervisor; Trade, Industry, Technical and Health Education; North Dakota Department of Career and Technical Education
