

Chemistry Education

About this Composite Major

The Chemistry Education major is designed to prepare you for teaching in junior and senior high schools. A Bachelor of Science in Education with a Chemistry major plus 12 semester hours in each of the other sciences (biology, earth and environmental science, and physics) will qualify you to teach those secondary science courses. Other opportunities, not part of any regular program, exist on campus and provide sound practical experience, such as student assistantships and participation in the campus-tutoring program.

As a Chemistry Education major you are placed into schools for a series of field experiences including Introduction to Education (40 hours); Practicum (80 hours); Culturally Diverse Practicum (25 hours involving 3 consecutive full days in a classroom), and a 12-week student teaching field experience. Student teaching is the culminating experience of the program and the opportunity for students to apply all they have learned.

Meet a Student

VCSU is where I found my place, my role and myself. My passion for teaching science was well received and positively influenced by my peers and professors. I'm sure every student here can say the same, that their passions for what they love and are interested in has been supported while attending VCSU. I transferred to VCSU my sophomore year. I remember visiting the chemistry lab on campus and thinking "you're telling me I can be in here working with these things?" Not only have I had many opportunities to learn from amazing professors, but I have also been able to teach and tutor chemistry, physics and STEM students. - Lindsey Kiecker, Jamestown, N.D.

Meet a Graduate

"I was drawn to the excitement and energy the faculty and my fellow Chemistry Ed major students brought to the university. The program challenged me and brought out the best of me as a student and person. We were able to compete and grow as friends inside the classroom/ laboratory and outside of it. I made connections I will have the rest of my life." —Jarvis Knudson '15, Kulm, N.D.

Practical Experience

The Rhoades Science Center includes a greenhouse for work in biology and botany, a planetarium and laboratories for biology, chemistry, earth science, physics, computer science, and photography studies.

On campus, the Rhoades Science Center includes a greenhouse for work in biology and botany, a planetarium and laboratories for biology, chemistry, earth science, physics, computer science, and photography studies. Students have access to:

- Infrared spectroscopy, Molecular spectroscopy
- Potentiometry, Refractometry and Polarimetry
- Organic structure software
- Excel data analysis
- Fully equipped Aquatic Macroinvertebrate Laboratory and Biomedical Research Laboratory

Learning Outcomes

1. Demonstrate a fundamental knowledge of the major concepts in chemistry.
2. Exhibit critical thinking skills by applying the scientific method to solve problems.
3. Exhibit the ability to read and communicate in a scientific style.
4. Exhibit the ability to collaborate
5. Understand the importance of chemistry to themselves and society.
