

Applied Kinesiology

About this Composite Major

The **Applied Kinesiology** program is designed for students interested in careers in non-teaching physical education, health education, and other fitness-related fields. The program is a part of the Kinesiology and Human Performance Department. Students enrolled in the program will develop an understanding of health and fitness-related services by providing students with field experiences mentored by professionals from their chosen fields.

The program of study aims to develop the concepts and theories of sport activities, along with the health and wellness behaviors of the general public. Students will acquire the skills needed to develop and/or assist other health and fitness professionals in publicly or privately owned and operated businesses.

Meet a Student

Modifying activity for my students was something that my learning in KHP helped me to do. I learned about different ways to challenge my students, but also learned about ways to modify activities for them to be able to gain confidence in their skills as well. - Katie Juarez, Angels Camp, California

Career Opportunities

2,557 jobs

listed in the upper Midwest in this field last year

\$44,000

median salary for degree holders

About VCSU

Our Foundation

VCSU isn't just a place to get an education – it's a community built on tradition that is powered by bright, innovative students who bring new ideas and potential.

Our Students

Here, students can be individuals and embrace their genuine selves while taking advantage of opportunities only VCSU can provide. Take a look at our unique make-up of individuals from all over the globe and different backgrounds, and see what makes us a favored landing place for talented students. VCSU is a launchpad that will help students leap into their careers or prepare them for graduate-level education.

Department of Kinesiology and Human Performance Mission

The Department of Kinesiology and Human Performance exists to prepare students to succeed within their professional field of study. The department's mission is to cultivate a learner-centered community and prepare students to function as critical thinkers using evidence-based practices. The Department of Kinesiology and Human Performance incorporates Valley City State University's mission through the use of technology, active learning, and meaningful scholarship.
