

Physical Education K-12

About this Composite Major

The **Physical Education major** is designed to prepare students for teaching physical education in grades K-12. Students will engage in content that includes the study of human anatomy and physiology, biomechanics, outdoor recreational pursuits, motor skills, and activities for the physical educator. At Valley City State University, our goal is to produce great physical educators who will make a difference in the lives of the students they teach. This goal is accomplished by providing students ample opportunities to practice and develop essential teaching skills while engaging in the physical education content. Students will become competent in the use of technology and will be able to demonstrate its application in the educational setting. Throughout the curriculum, learners will work with master teachers who will effectively prepare the students to teach in today's physical education classroom.

Flexible Degree Options

1. Online Physical Education

- VCSU offers a fully **online Physical Education** degree program for working students or students who live outside the VCSU area. We are focused on providing a comprehensive and interactive program that allows our online students to pursue their educational goals in a non-traditional manner.

2. Physical Education with Adapted Physical Education Minor

- This **major** and **minor** combination equips future educators with the skills needed to create inclusive learning environments for individuals with special needs. Through extended learning opportunities and practical experiences, students will develop an understanding of accommodating diverse needs, developing effective teaching strategies, and compliance with legal requirements. Students are encouraged to consider a minor in adapted physical education as it increases their employability and versatility as an educator.

3. Physical Education and Health Education Double Major

- With this dual focus, students develop a diverse skill set which prepares the future educator to teach a broad range of courses. With the addition of courses focused on mental health, community health, disease, and drug prevention, students have the opportunity to learn about and develop the skills needed to provide holistic health instruction inside and outside of the classroom.

Meet a Student

I would say that if someone is looking for a place to become an outstanding teacher, VCSU is a terrific place to start that process. What I experienced in and out of the classroom has made me the teacher that I am today and has given me the tools to excel. One thing that always stuck out to me was how often we observed and taught lessons to live classes in the high school and elementary setting. It helped to build confidence throughout my 4 years and gave me firsthand experience of what it takes to be a great teacher. Learning how to create and teach lessons with valuable content was also a huge focus during my time at VCSU. Lesson planning opened my eyes to a variety of resources and gave me a firm foundation in what it takes to become a teacher. Lastly, the interaction with the professors was top notch. They were always available to help with any questions or concerns that came up and formed a great relationship with each student. Overall, my time spent at VCSU was exceptional and integral in becoming an educator. - Andrew Hirsch '18

Career Opportunities

Students in this degree path have career opportunities in **physical education, fitness, recreation, and coaching.**

- K-12 Physical Education Teacher
- Coach
- Personal trainer
- Activities coordinator

Accreditation

- Council for the Accreditation of Educator Preparation (CAEP)

Teacher Education Requirements

Students must apply for and be accepted into the VCSU Teacher Education Program to complete courses required for teacher certification. Students should plan to apply for acceptance into the Teacher Education Program after their sophomore year or the beginning of their junior year. This program requires a minimum cumulative GPA of 2.75 or higher and evidence of reading, writing, and math proficiency. Additional criteria for admission to Teacher Education can be found within the VCSU Catalog (<http://catalog.vcsu.edu/undergraduate-catalog/teacher-education-program/>).

Get Involved in the Major

The **Kinesiology and Human Performance Club** empowers students by providing invaluable opportunities such as attending professional conferences, crafting resume materials, preparing for exams like the GRE and PRAXIS, navigating the application processes for professional graduate programs, and studying for certifications and credentialing exams. The club is dedicated to cultivating students' growth and achievement within their discipline, fostering success in both academic and professional environments.

Learning Outcomes

1. The teacher candidate will be able to apply discipline-specific scientific concepts as related to the physical education major.
2. The teacher candidate will demonstrate the ability to apply the concepts of fitness into the physical education lesson.
3. The teacher candidate will demonstrate the ability to provide reasonable accommodations for students with disabilities.
4. The teacher candidate will demonstrate the ability to plan, implement, evaluate, and reflect age-appropriate physical education content in the communication of written lesson plans.
5. The teacher candidate will demonstrate the ability to effectively manage and transition in the physical education classroom.
6. The teacher candidate will demonstrate the ability to assess and provide for a safe learning environment.
7. The teacher candidate will demonstrate proficiency in first aid, CPR, and AED.
8. The teacher candidate will be able to apply discipline-specific activities as related to the physical education major.
